PREFACE

The Information and Communication Technology (ICT) in schools have been subsumed in the Rashtriya Madhyamik Shiksha Abhiyan (RMSA). Now ICT in Schools is a component of the RMSA. The Information and Communication Technology (ICT) in Schools was launched in December, 2004 and revised in 2010 to provide opportunities to secondary stage students to mainly build their capacity on ICT skills and make them learn through computer aided learning process. The Scheme is a major catalyst to bridge the digital divide amongst students of various socio economic and other geographical barriers. The Scheme provides support to States/UTs to establish computer labs on sustainable basis.

INFORMATION AND COMMUNICATION TECHNOLOGY AT SECONDARY EDUCATION book presents the results of a study on students' appreciation of information and communication technology (ICT) applications in schools for general secondary education. We investigate to what extent students from different gender and ethnic backgrounds appreciate various characteristics of ICT tools. This book is designed specifically for students training to teach ICT as a curriculum subject at secondary level. It develops the key ideas of teaching and learning ICT in a structured, accessible way, and provides a wealth of ideas and inspiration for the learning teacher. Key areas covered are:

Chapter 1: Introduction to ICT

Chapter 2: Information Technology

Chapter-3: E-Learning

Chapter 4: Ubiquitous Learning

Chapter 5: Multi-Media Technology

Chapter 6: Audiovisual Technology

Chapter 7: E-Learning Modules and Tools

Chapter 8: Web Based Teaching-Learning

INDEX

Chapter 1: Introduction to ICT	1
1.1 Information and Communication Technology: Meaning, Definitions, Nature and Revolution.....	1
1.1.1 Meaning:	1
