PREFACE

The primary goal of the C++ programming language's introduction was to give the C language object-oriented capabilities. OOPs are advantageous to both designers and users in a number of ways. They are also crucial in a number of fields, such as user interface design, modelling, simulation, and so forth.

Object-Oriented Programming using CPP aims to implement real-world entities like inheritance, hiding, polymorphism, etc. in programming. The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function. It is described as per Pune and Solapur University for Engineering, Diploma, BCA/MCA and Computer Science background students.

Course Objectives:

- To explore the principles of Object-Oriented Programming (OOP).
- To understand object-oriented concepts such as data abstraction, encapsulation, inheritance, dynamic binding, and polymorphism.
- To use the object-oriented paradigm in program design.
- To lay a foundation for advanced programming.
- Provide programming insight using OOP constructs.

Course Outcomes: On completion of the course, student will be able to–

- Analyze the strengths of object-oriented programming
- Design and apply OOP principles for effective programming
- Develop programming application using object-oriented programming language C++
- Percept the utility and applicability of OOP

Dedicated

To

INDEX

THEORY	1
Unit 1: Introduction to (Object Oriented Programming)	2
1.1 Introduction to OPP:.....	2
1.1.1 Features of OOP's:.....	3
1.2 Comparison between POP (Procedural Oriented Programming) and OOP:.....	22
1.2.1 Procedural Oriented Programming (POP):.....	22
1.2.2 Object-Oriented Programming (OOP):.....	24
1.2.3 Advantages of OOP: -.....	24
1.2.4 Disadvantages of OOP: -.....	25
1.2.5 Application of OOP:.....	26
Unit 2: Introduction of C++	28
2.1 Introduction of C++:.....	28
2.2 History of C++:.....	28
2.3 C++ basics (C++ tokens):.....	29
2.3.1 Keywords:.....	30
2.3.2 Identifiers:.....	30
2.3.3 Data Types:.....	31
2.3.4 Constants:.....	31
2.3.5 Operators:.....	31
2.3.6 Special Symbols:.....	32
2.3.7 Control Flow Statements:.....	33
2.4 Types of Variables:.....	40
2.4.1 Variable Definition in C++:.....	42
2.4.2 Variable Declaration in C++.....	43
2.4.3 Pointer and Reference:.....	44
2.5 Structure of C++ program:.....	45
2.5.1 Introduction to cin and cout objects Function and its types:.....	46
2.6 Function and its Types:.....	47
2.6.1 Template:.....	50
2.6.2 Default argument:.....	52
2.6.3 Parameter passing methods:.....	53
2.6.4 Inline Function:.....	57
2.7 Static polymorphism (Function overloading):.....	59
Unit 3: Classes and Objects	61
3.1 Introduction to Class and Object:.....	61
3.2 Defining class (Class Specification), Creating object.....	62
3.3 Access specifier (Visibility modes)-Public, Protected, Private:.....	63

3.4 Class members- data members, member & Non-member function:	68
3.5 Defining member function inside and outside the class:	69
3.6 Static Data Members and Static Member Functions:	69
3.6.1 Static Member Function:	71
3.7 Pointer to object:	72
3.8 Array of object:	74
3.9 Returning objects and Passing object from functions as parameter by value, by pointer, by reference:	76
3.10 Dynamic memory allocation (new, delete):	78
3.10.1 New:	78
3.10.2 Delete:	78
3.11 Friend function and friend class:	80
3.11.1 Nesting of classes:	83
3.12 Constructors Concept and characteristics of constructor:	84
3.13 Types of constructors- default, parameterized and copy:	86
3.13.1 Default:	86
3.13.2 Parameterized:	87
3.13.3 Copy:	88
3.14 Constructor overloading:	89
3.14.1 Constructor with default argument:	90
3.15 Destructor Concept, characteristics of destructor:	91
3.15.1 Destructors have several key characteristics:	91
3.16 Static polymorphism (Operator overloading) Concept- rules to overload operator:	92
3.16.1 Unary and binary operator overloading:	93
3.16.2 Overloading operator using member function and friend function:	94
3.17 Type conversion (type casting)- implicit and explicit:	95
3.17.1 Implicit Type Conversion:	95
3.17.2 Explicit Type Conversion:	96

Unit 4: Inheritance and Runtime Polymorphism98

4.1 Introduction of Inheritance, benefits, use:	98
4.2 Defining derived class and Base class:	99
4.3 Types of derivations:	101
4.3.1 Public Derivation:	101
4.3.2 Protected Derivation:	102
4.3.3 Private Derivation:	103
4.4 Types (Forms) of Inheritance- Single, Multi-level, Multiple, Hierarchical, Hybrid, Multi-path (Virtual base class):	104
4.4.1 Single:	104
4.4.2 Multiple Inheritance:	105
4.4.3 Multilevel Inheritance:	107
4.4.4 Hierarchical Inheritance:	108
4.4.5 Hybrid Inheritance:	110
4.5 Behavior of constructors and destructor in inheritance:	112
4.5.1 Constructors in Inheritance:	112
4.5.2 Destructors in Inheritance:	112

4.6 Overloaded member functions:.....	113
4.7 Pointer to base class and Pointer to derived class:	114
4.8 Object composition-delegation:	115
4.9 Runtime polymorphism or Introduction of runtime polymorphism:	117
4.9.1 Virtual functions- Concept:.....	118
4.9.2 Characteristics and use of virtual function:	120
4.9.3 Abstract class:	120
4.9.4 Virtual Destructors:	121
Unit 5: Stream and File	124
5.1 Introduction to streams in C++:.....	124
5.2 Stream classes and File stream classes:	126
5.2.1 Stream classes	126
5.3 Formatted and unformatted I/O functions and Manipulators:	129
5.3.1 Formatted I/O:	129
5.3.2 Unformatted I/O:	129
5.3.3 Manipulators:	130
5.4 File Manipulations- Opening, Closing, Reading, Writing, Appending:	131
5.5 File opening modes-Opening files, using open() and constructor:	132
5.5.1 Using Constructor:	132
5.6 Error Handling During File Manipulations:	134
5.7 Command Line Arguments:	136
Chapter 6: Exception Handling and Template	138
6.1 Introduction to Exception handling:	138
6.2 Exception handling mechanism-try, catch, throw keywords:.....	139
6.3 Custom Exception:.....	140
6.4 Introduction to function template- overloaded function and user defined template	142
6.5 Class Template- Inheritance of Class Template, Overloaded Operators and Class Template Containership:.....	145
Practical Examples	147
Examples.....	148
References.....	208

ABOUT THE AUTHOR

Mrs. Rajani Adam

She Received the MCA from Tilak Maharashtra University, Pune in 2010. She has worked as a lecturer at A. R. Burla College, Solapur with the experience of 7 years. She is Currently working as a Publisher of Kripa Drishti Publications, Pune. Research Contribution: Her aim is to help esteemed University/College/Institute and organization to serve the Academic Professional Development Service to students, research scholars, Faculties, and staff. Published National/International Books, Edited Books, Reference Books, Textbooks. Running Online research courses (Research Methodology) for PhD. Scholars with Moodle platform. Organizing and publishing Conferences/Seminars proceedings PhD. guidance and API guidance provided.

Conducting the following international peer reviewed journals.

1. International Journal of Research and Analysis in Science and Engineering (ISSN: 2582-8118)
2. International Journal of Research and Analysis in Commerce and Management (ISSN: 2583-6285)

Founder Member of Shrividya Learning Institute, Solapur, Maharashtra.

Founder Member of Vega Software Technologies, Pune.

Publisher, Kripa Drishti Publications, Pune.

Kripa-Drishti Publications

A-503 Poorva Heights, Pashan-Sus Road, Near Sai Chowk,
Pune – 411021, Maharashtra, India.
