## **PREFACE**

**“Physical Pharmaceutics-II (Theory)”** The numerous physical and physicochemical characteristics and concepts related to dosage forms and formulations are covered in this book. The subject's theoretical components give students a deeper understanding of formulation research and development, as well as stability studies of pharmaceutical dosage forms.

The physical characteristics of medications, formulation principles, and drug delivery systems are just a few of the many subjects covered in this book. With its concise explanations and comprehensive illustrations, this book offers a comprehensive grasp of the basic ideas underlying the science of physical pharmacy.

This book **Physical Pharmaceutics-II (Theory)** serves as an invaluable notes designed to fulfil the long-term requirement of B.Pharm 2nd Year 4th Semester students. It's clear and thorough presentation of the subject makes it perfect for students to use as self-study material. The entire Physical Pharmaceutics-II Theory syllabus is covered in the five chapters that make up this book. This book's main characteristic is its straightforward, comprehensive approach, which includes tables and illustrations. The material is prepared with the student's need for rapid comprehension and accuracy in mind, closely adhering to the PCI syllabus for subject code BP403T in the fourth semester of the B. Pharm program.

### **Objectives:**

1. Understand various physicochemical properties of drug molecules in the designing the dosage forms
2. Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
3. Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.

## **Abbreviations**

Active Pharmaceutical Ingredients (API)

American Dental Association's (ADA)

Brunaver, Emmett, and Teller (BET)

Centistokes (CST)

Centimetre Gram Second (CGS)

Chloride (Cl)

Critical Micelle Concentration (CMC)

Degree of Substitution (DS)

Discrete Element Method (DEM)

Dynamic Light Scattering (DLS)

Flow Point (FP)

Gates-Gaudin-Schuhmann (GGS)

Hindered Amine Light Stabilizers (HALS)

International Standardization's Organization (ISO)

Madin-Darby Canine Kidney (MDCK)

Nanoparticle Tracking Analysis (NTA)

Over-The-Counter (OTC)

Parallel Artificial Membrane Permeability Assay (PAMPA)

Particle Size Distribution (PSD)

Point (PI)

Rosin-Rammler (RR)

Rotational Viscometer (RV)

Solute Carriers (SLC)

Stoke (S)

Temperature (T)

Velocity (V)

Water Oil Ratio (WOR)

Wet-Points (WP)

# INDEX

<b>Unit 1: Colloidal Dispersions .....</b>	<b>1</b>
1.1 Introduction:.....	1
1.1.1 Colloids Meaning and Definition: .....	1
1.2 Classification of Dispersed Systems & Their General Characteristics: .....	5
1.2.1 General Characteristics of Dispersed Systems: .....	6
1.2.2 Structure and Properties of Dispersions: .....	6
1.2.3 Colloid:.....	7
1.2.4 Hydrocolloids: .....	7
1.3 Size & Shapes of Colloidal Particles:.....	8
1.3.1 Different Shapes of Colloids: .....	9
1.3.2 Colloidal Particle: .....	10
1.4 Classification of Colloids & Comparative Account of Their General Properties: .....	12
1.4.1 Classification of Colloids: .....	12
1.4.2 Comparative Account of Their General Properties: .....	14
1.5 Optical, Kinetic & Electrical Properties: .....	16
1.5.1 Kinetic Properties: .....	16
1.5.2 Electrical Properties: .....	19
1.5.3 Optical Properties: .....	23
1.6 Effect of Electrolytes:.....	25
1.6.1 The Key Electrolyte Components:.....	26
1.7 Coacervation: .....	29
1.8 Peptization & Protective Action:.....	30
<b>Unit 2: Rheology.....</b>	<b>33</b>
2.1 Introduction of Rheology:.....	33
2.1.1 Newtonian System: .....	34
2.1.2 Law of Flow: .....	35
2.1.3 Kinematic Viscosity:.....	37
2.1.4 Effects of Temperature on Viscosity: .....	40
2.1.5 Non-Newtonian System: .....	44
2.1.6 Pseudoplastic: .....	47
2.1.7 Dilatant: .....	50
2.1.8 Plastic: .....	52

2.1.9 Thixotropic: .....	54
2.1.10 Thixotropic in Formulation:.....	57
2.1.11 Determination of Viscosity:.....	59
2.1.12 Capillary: .....	65
2.1.13 Falling Sphere: .....	68
2.1.14 Rotational Viscometers: .....	71
2.2 Deformation of Solids:.....	73
2.2.1 Plastic and Elastic Deformation:.....	74
2.2.2 Hackel Equation:.....	76
2.2.3 Stress: .....	77
2.2.4 Strain: .....	78
2.2.5 Modulus of Elasticity: .....	79
<b>Unit 3: Coarse Dispersion .....</b>	<b>81</b>
3.1 Introduction: .....	81
3.1.1 Structure and Properties: .....	81
3.2 Suspension: .....	82
3.2.1 Colloid: .....	83
3.3 Interfacial Properties of Suspended Particles:.....	85
3.4 Settling in Suspensions: .....	88
3.4.1 Single Particle Drags:.....	90
3.5 Kaolin Suspensions: .....	92
3.5.1 Controlled Flocculation:.....	93
3.5.2 Formulation of Suspensions: .....	95
3.5.3 Methods to Overcome Stability Problem: .....	96
3.6 Emulsions and Theories of Emulsification: .....	98
3.6.1 Emulsifier: .....	98
3.6.2 Theories of Emulsification: Importance:.....	100
3.7 Microemulsion and Multiple Emulsions:.....	100
3.7.1 Microemulsion: .....	100
3.7.2 Multiple Emulsions: .....	107
3.8 Stability of Emulsions:.....	113
3.8.1 Evaluation of Emulsion: .....	116
3.9 Preservation of Emulsions: .....	117
3.10 Rheological Properties of Emulsions and Emulsion Formulation by HLB Method:.....	119
3.10.1 Rheology and Rheological Properties: .....	119

**Unit 4: Micromeritics .....125**

4.1 Introduction:.....	125
4.2 Particle Size and Distribution: .....	125
4.2.1 Purpose of Particle Size Distribution Analysis:.....	126
4.2.2 Importance of Particle Size Distribution:.....	126
4.3 Mean Particle Size:.....	129
4.3.1 Particle Sizes Distribution Models: .....	130
4.4 Number and Weight Distribution:.....	132
4.4.1 Number Vs. Volume Distribution:.....	134
4.5 Particle Number: .....	135
4.6 Methods for Determining Particle Size by Different Methods: .....	136
4.6.1 Common Methods of Particle Size Measurement: .....	137
4.7 Counting and Separation Method:.....	142
4.8 Particle Shape and Surface Area: .....	146
4.8.1 Particle Shape: .....	146
4.8.2 Specific Surface: .....	147
4.9 Methods for Determining Surface Area: .....	147
4.10 Permeability: .....	152
4.11 Adsorption:.....	154
4.11.1 Adsorption Enthalpy: .....	155
4.11.2 Different Instances of Adsorption:.....	156
4.11.3 Types of Adsorption:.....	156
4.12 Derived Properties of Powders:.....	157
4.13 Porosity: .....	158
4.14 Packing Arrangement: .....	158
4.15 Densities:.....	160
4.16 Bulkiness and Densities: .....	161
4.16.1 Flow Properties:.....	161
4.16.2 Flow Properties of Powders:.....	162
4.16.3 Methods to Determine Flow Properties of Powders: .....	163

**Unit 5: Drug Stability .....166**

5.1 Introduction:.....	166
5.2 Reaction Kinetics: .....	167
5.2.1 Zero:.....	167
5.2.2 Pseudo-Zero:.....	170
5.2.3 First and Second Order:.....	171
5.2.4 Units of Basic Rate Constant:.....	171
5.2.5 Determination of Reaction of Order: .....	174

5.3 Physical and chemical factors influencing the chemical degradation of Pharmaceutical Product: .....	177
5.3.1 Temperature: .....	177
5.3.2 Solvent: .....	178
5.3.3 Ionic Strength: .....	178
5.3.4 Dielectric Constant: .....	178
5.3.5 Specific & General Acid Base Catalysis: .....	179
5.3.6 Simple Numerical Problems: .....	181
5.4 Stabilization of Medicinal Agents against Common Reactions Like Hydrolysis and Oxidation: .....	181
5.4.1 Hydrolysis: .....	181
5.4.2 Oxidation: .....	183
5.5 Accelerated Stability Testing in expiration dating of Pharmaceutical Dosage Forms: .....	188
5.5.1 Stability Testing: .....	188
5.5.2 Expiration Dating: .....	191
5.6 Photolytic Degradation and its Prevention: .....	192
5.6.1 Effect of Photolytic Degradation: .....	194
5.6.2 Factors Causing Photolytic Degradation: .....	194
<b>Reference .....</b>	<b>195</b>

## ABOUT THE AUTHORS

**Mr. Rohit Krishna Pawar**, He is currently working as Assistant Professor at SDNCRES's, Late Narayandas Bhawandas Chhabada Institute of Pharmacy, Raigaon, Satara. He has completed M. Pharm. in Pharmaceutics from Savitribai Phule Pune University. He has published a text book of Quality Assurance for Degree Pharmacy students and also a text book of Pharmaceutics for Pharm D. students. He received 2 Indian Patent Grants (Designs). His research interest includes GRDDS, Nanoparticles, and Herbal formulations. He received 1 Copyrights grant from Copyright Office, Government of India for his value-added courses designs. He has worked as Jury member and Evaluator in chief for various national & International quiz/poster competitions. He is reviewer & editor of many journals & publications houses. He published more than 30 review as well as research papers in various UGC Care, Scopus journals. He is member of Association of Pharmacy Teachers in India.

**Mr. Ravikumar Ravasaheb Patil**, He is currently working as Assistant Professor at SDNCRES's, Late Narayandas Bhawandas Chhabada Institute of Pharmacy, Raigaon, Satara. He has completed M.Pharm in Pharmaceutics from Rajiv Gandhi Health & Science University, Bengaluru. He has published a text book of Quality Assurance for Degree Pharmacy students His research interest includes Strip formulation, Nanoparticles, Cosmetic formulations. He received 1 Indian Patent Grants (Designs) & He received 1 Copyrights grant from Copyright Office, Government of India for his value-added courses designs. He is reviewer & editor of many journals & publications houses. He is reviewer & editor of many journals & publications houses. He published more than 45 review as well as research papers in various UGC Care, Scopus journals. He is member of Association of Pharmacy Teachers in India.

**Ms. Rajashri Eknath Badadare-Jadhav** is currently working as HOD at MSS's College of Pharmacy, Medha. She has completed M. Pharmacy in Pharmaceutics from YSPM'S YTC Satara. She has received one Indian Patent Grant (Design). Currently, she is pursuing PhD from Sandeep University Nashik. She has more than 7 years of experience in academics. She has published research and review papers in various journals. She is author of more than 2 books in pharmaceutical sciences.

**Ms. Amruta Parmeshwar Shelke**, She is currently working as Assistant Professor at SDNCRES's, Late Narayandas Bhawandas Chhabada Institute of Pharmacy, Raigaon, Satara. She has completed M. Pharm. in Pharmaceutics from Savitribai Phule Pune University. She received 1 Indian Patent Grants (Designs). Her research interest includes Nanostructure Lipid Carriers, Nanoparticles, and Herbal formulations. She has Participate as various national & International Seminar/poster competitions. She published more than 15 review as well as research papers in various UGC Care, Scopus journals. She is member of Association of Pharmacy Teachers in India.

**Mr. SushilKumar Mohan Sarvagod** have completed B Pharm from Government College of Pharmacy Karad and M. Pharm from Bharati Vidyapeeth College of Pharmacy Kolhapur. Currently he is a working as Asst Professor at Womens College of Pharmacy Pethvadgao. He has total 16 years teaching experience and he attended international, national conference, seminars, FDP and various workshops.
